BLUE Waters Products Ltd has made its first shipment of purified bottled water to Cuba, marking a significant step in its regional export expansion.

The Trinidad and Tobago Manufacturers' Association (TTMA) announced the development in a Facebook post yesterday, stating: 'Blue Waters Products Limited is proud to celebrate their first shipment of purified bottled water to the Cuban market. This milestone comes after more than a year of dedicated effort, building relationships and exploring opportunities following their visit to FIHAV 2024.'

FIHAV 2024 is the Havana International FairCuba's largest annual multi-sector trade show. The event brings together over 60 countries and thousands of businesses exploring trade opportunities.

The TTMA added that Blue Waters is excited to see the first container on its way and looks forward to many more shipments and continued growth in this new market.
